**ENDORSEMENT FROM OUR LEADERS**

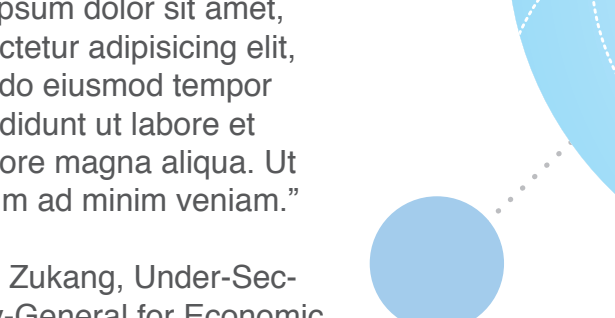

“Social networking is changing how we interact - and it can change our world. You are in touch with peers from around the world. You understand the power of instant communication. I appeal to you to use that power for the common good, the power of communication and the power of networking.”

In 2011, it is estimated that 250 MILLION people logged on to facebook EVERY DAY.

Social Media is here to stay, people of all ages globally are logging on to a network, finding others, uploading content and learning from others.

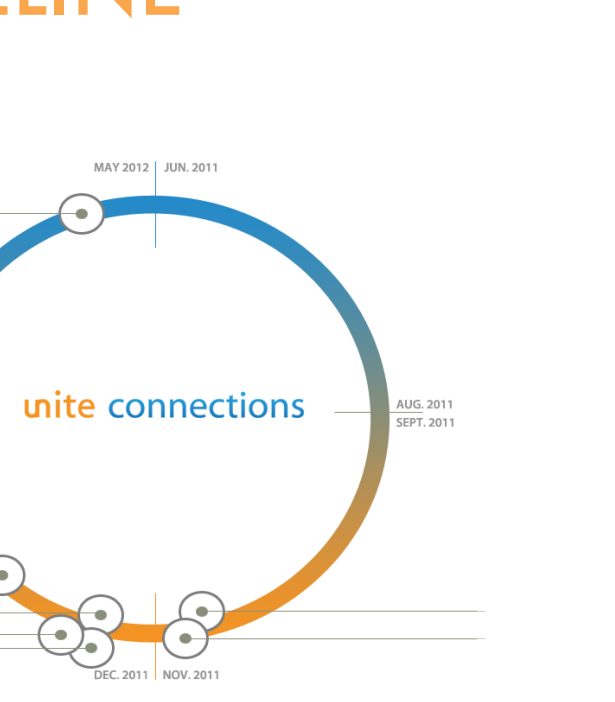

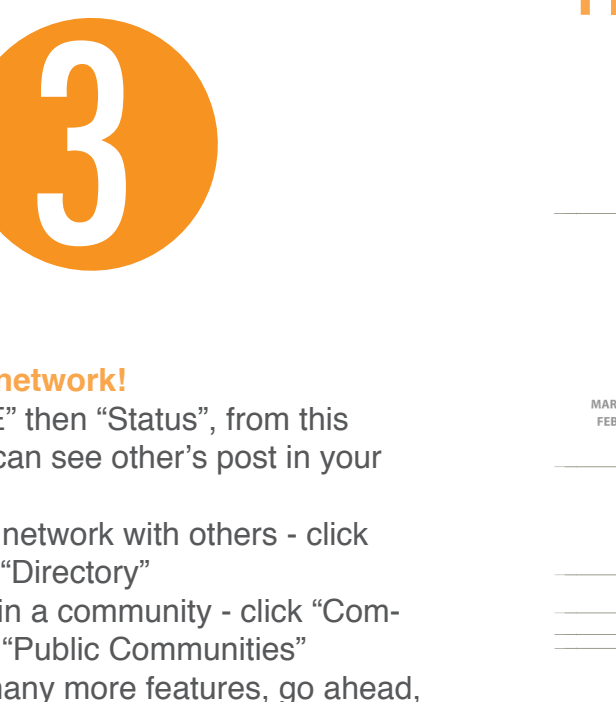

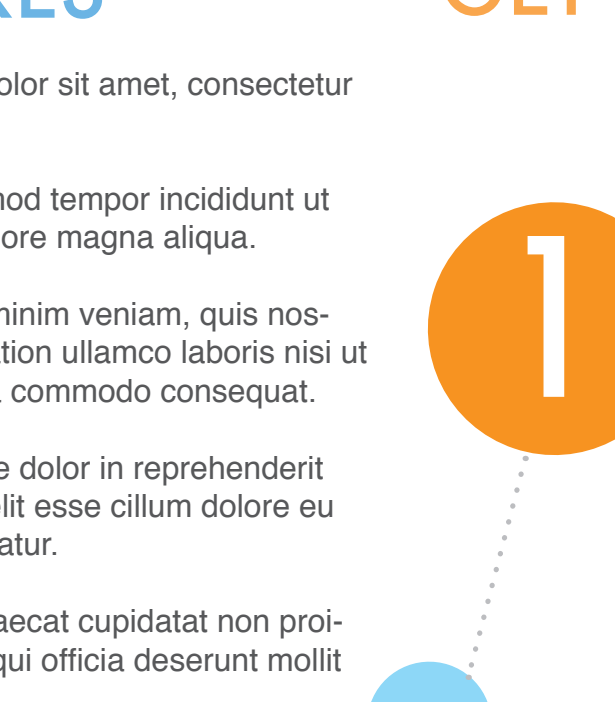

The medium has grown to influence the news, insight political change, and affect our lives.

What if there was a network inside the UN, open to all UN staff, where a member has all the capabilities to share and find UN information - but safe from the outside world?
