11.	How could this IASC product be improved?
1	Update the presentation and adapt the content to new issues, such as HIV treatment which is now accessible but in generalc it is still interesting to use and contains most of the necessary information. Nevertheless it might be adapted to different environments as it is mainly focusing on African situations
2	I thought IASC Task Force was preparing an update??
3	Translate into national languages

1	Should be given to evry person dealing with emergency situations all over the world. Training programme was developed but not properly used
2	Through a joint responsibility OCHA/UNAIDS at filed level with global M and E by IASC
3	Translate into national languages; share with NGO partners and local health authorities

1	six years with no monitoring of its use and no recommendations formulated to improve its use is far too much, there is a need to monitor the use of any product (as privae sector does) producing a guidance is not an end in itself, just the beginning of a process to ensure all partners work in a coherent manner in the filed, and for what I have seen through some consultations in the field in emergency and post emergency settings, there is a lot of room for improving coordination through proper, independant and professional monitoring at filed level. Why not sending a consultant (me) in a given context and do so, as a first start?
