Guidance note on the importation of Medicines and Medical Equipment in response to the novel coronavirus pandemic (COVID-19)

“Survive together or sink together”

I. General background

In light of the current novel coronavirus (2019-nCoV) global pandemic (COVID-19), the United Nations Office for the Coordination of Humanitarian Affairs (UN OCHA) in collaboration with the United Nations Conference on Trade and Development (UNCTAD) and the World Customs Organization (WCO) have compiled a list of measures relating to the importation and Customs clearance of medicines and medical equipment.

This document has been written for Customs administrations and cross border agencies to guide them as to how to better communicate on Customs facilitation measures for the importation of medicines and medical equipment. It addresses what information is needed, ensuring that international recommendations are met in the current circumstances.

II. List of measures facilitating the importation and Customs clearance of Medicines and Medical Equipment during the response to the COVID-19 outbreak for Customs administrations and cross-border agencies.

**Importation of medicines and medical equipment related to the COVID-19 pandemic response**

1. Has the government declared a national essential list of COVID-19 priority items?
2. Have national extended HS codes (based on the WCO suggested list) been defined by your Customs administration for these items?
3. Has this list been exempted from pre-clearance restrictions from all government regulatory authorities?
4. Which medicines and medical equipment are prohibited? Which are restricted?
5. What are the expedited/quick release Customs processes for temperature-sensitive medicines and medical equipment?
6. Is there a need for a specific certification from the Ministry of Health or the national drug regulatory authority?
   6.1. If so, what is the fast-track procedure for obtaining this?
7. Are there any provisions in national guidelines for the importation of medicines and medical equipment that should be highlighted to assist humanitarian actors in the delivery of goods (e.g.: guidelines for the expiry date of the goods from the arrival date, appropriate languages for the instructions for use, packaging restrictions, etc.)?

8. Have the focal points within your administration to whom the shipping documents can be sent in advance been identified and shared?

9. Is there a procedure to formalise/regularise expedited importations?

10. What are the risks related to fast-track Customs clearance for future Customs audits?

11. What are the consequences/penalties for failure to account for or regularise importation requirements for essential COVID-19 items?

12. Have these official procedures/Standard Operating Procedures been published and/or shared with the relevant actors?

**General questions related to entry points**

13. What is the current situation at the country’s international airports, sea ports and land ports (flight/ship/truck restrictions/exemptions, etc.)?

14. Which specific Customs entry points can medicines and medical equipment be imported through (air, land or maritime borders)?

15. Are there temperature regulated storage spaces at each of these crossing points (at the airport (cold room) or seaport (reefer container plug in facilities))?

16. Are there functional private Customs bonded warehouses near airports and sea ports?
   16.1. Do these Customs bonded warehouses offer temperature regulated facilities for the storage of medicines and medical equipment?

17. If your country is landlocked, which borders must be crossed to import medicines and medical equipment (indicate countries and related specific Customs entry/exit points)?

**National coordination**

18. If there is an inter-ministerial taskforce or coordination body (including Customs administration) to facilitate quick release of relief cargo, who is the focal point?

19. Has a one-stop-shop been established?

20. What other agencies and actors do you have to interact with in the end-to-end importation process?

21. If your country has an authorized economic operators (AEOs) programme, where is the list of AEOs?
